

Do you want to join „ Free community VAP “?

If you're fancy to help with spreading of ideals of freedom, equality, social, environmental and emancipatory fight, join us.

There is a large scale of possibilities and levels of cooperation and there is a large scale of issues, which we are focusing for. Issues and topics of our activities are determined mainly by activists themselves, reflecting not only recent situation but they are also part of long-term strategies, settled among all member collectives, groups and individuals. Crucial element of our work is so called „free community“. Everybody, who joins or supports us in our activities, is considered as a member of community, both from individual and collective perspective. By this membership, there are no other or further obligations or duties, membership only allows, depending on the depth of cooperation, to be part of decision-making process within free community. Communication between local „crews“ is maintained by „contact points“. These contact points are designated individual activists and/or secured electronic communication. Essential element of free community is openness to everybody who is willing to work on spreading and propagation of ideas close to our mind. It doesn't matter if one is a manager in bank, student of economy or policeman. To enable cooperation to those who don't want open cooperation, we have also several anonymous contributors and contact points. Recently, crucial focus of our activism is work with information. Its gathering and latter use to uncover substances of political-economical system. Whole activity is on confidential level and there is no place to share details. For this spectrum of contacts is anonymous cooperation the best. We are able to secure identities on comparatively high level. Due to informal organizational structure, many of our activists are simultaneously members to other groups and collectives. It facilitates and simplifies communication and information exchange across anarchist movement. Because of high security standards and procedures, we do not centralize contacts and information on one place and maintaining communication and contacts is mostly upon local crews. Those individuals or groups who are linked to other persons in their neighborhood who participate both directly and indirectly on our activities, are considered as crew. Information exchange, recruitment and links to other entities is in full responsibility of activists maintaining contact point. Our desire and long-term goal are to provide flexible environment and community reflecting needs of activists themselves as well as background and other development. If you're fancy to join us, you certainly will find any activity which would suit you. Form of communication with the rest of community would be settled to suit you as well as to reflect level of your commitment to „confidential“ activities and to minimize security threats and risks. Do not hesitate to contact us. Both your ideas and hands are necessary to support the idea.
